JOSÉ BURGUILLOS

JUNIOR WEB DEVELOPER | IT SUPPORT | AUTOMATION & AI

610 369 613 | joseab078@gmail.com | Lucena (Córdoba), Spain
joseburguillos.vercel.app | github.com/JoseBurguillos
Availability: on-site, hybrid, and remote. Willing to travel.

PROFESSIONAL PROFILE

Junior professional with vocational training in Microcomputer Systems and Networks and a Higher Vocational Diploma in Web Application Development (DAW), completed through a bilingual programme at IES Trassierra. Internship experience in IT support at Recosur (3 months) and web development at Deuser / Indra Group (4 months). Application development using Angular, Node.js, C# and REST APIs; automation with n8n, local models with Ollama, and serverless services with Cloudflare Workers.

PROFESSIONAL EXPERIENCE

Web Developer Intern | Deuser / Indra Group | 2024 | 4 months
- Contributed to the development and maintenance of applications using C#, Angular, Node.js, and React.
- Created APIs and endpoints and integrated applications with external APIs.
- Used MongoDB, Git, and Docker across team projects.

IT Support Technician Intern | Recosur | March 2024 - June 2024 | 3 months
- Resolved hardware and software issues and maintained computers and networks.
- Provided telephone support to customers and users; logged and tracked incidents using management tools and helpdesk procedures.
- Installed software, performed basic computer and network configuration, and used Active Directory for support tasks.

TECHNICAL SKILLS

IT support and systems: helpdesk, hardware, peripherals, Windows 10/11, Windows Server, Active Directory, Microsoft 365, Outlook, Teams, AnyDesk, and TeamViewer. Basic Linux knowledge.
Networking and maintenance: LAN/Wi-Fi, basic network configuration, VirtualBox, Cisco Packet Tracer, backups, Clonezilla, and drivers.
Web development: Angular, React, TypeScript, JavaScript, HTML5, CSS3, Node.js, Express, C#, Python, REST APIs, and JWT.
Automation, AI, and cloud: n8n, local models with Ollama, AI API integration, WhatsApp Cloud API, FLUX, and Cloudflare Workers.
Databases and tools: MongoDB, SQL, PostgreSQL, MySQL, SQLite, Git, GitHub, Docker, and Postman.

PROJECTS

Intelligent Assistant for Home Renovation Companies
Functional prototype built with n8n (50+ nodes), Node.js, Express, Angular, and SQLite. Automates customer requests received through the WhatsApp Cloud API using AI, context management, and data validation. Integrates Google Drive and sketch generation with FLUX. Includes an admin dashboard for requests, site visits, and quotes, with JWT authentication. Runs locally while connecting to external services.

ADOPT-ME | Final Degree Project | 2026
Pet adoption platform with a catalogue, applications, favourites, messaging, and an admin dashboard. Angular, TypeScript, Node.js, Express, MongoDB, JWT, Cloudinary, and Stripe.
github.com/JoseBurguillos/TFG-adoptme

Employee Time Tracking System | Personal Project | 2026
Clock-in and clock-out records, token-based authentication, geolocation, history, and an admin dashboard. Angular, Python, and SQLite.
